The prior art fails to teach a combination of all the claimed features as presented in claim(s) 6, wherein the claimed invention comprises, in claim 6, the guide member being positioned in a quadrant next to a quadrant where the motor exists and arranged to overlap with the holding unit as viewed from the subject side, closer to the subject side than the holding unit and movable relatively to the holding unit in the direction of the optical axis, wherein the holding unit includes an overhang portion holding the image picking-up device in the direction of the subject side on the optical axis, and the motor and the guide member are arranged so as to avoid the overhang portion in the direction perpendicular to the optical axis when the motor and the guide member come relatively close to the holding unit and reach a position where the motor and the guide member overlap with the overhang portion, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
